PROFILE

Full-Stack Developer experienced in building end-to-end web applications with React.js on the frontend and Node.js/Express/MongoDB or Django on the backend. Skilled in component architecture, REST API design, authentication, and database modeling, with strong OOP and data structures foundations. Computer Science graduate from Ain Shams University with hands-on training at ITI, Algoriza, and Mentality.

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer (React, Node.js & Django) — Egyptian Armed Forces 09/2025 – Present

- Built and maintained 3+ internal web systems used daily by 200+ personnel.
- Reduced manual reporting time by ~40% by automating workflows with Node.js and Django REST APIs.
- Led frontend migration to React.js, improving page load speed by 35%.

Front-End Internship — Mentality 08/2024 – 11/2024

- Built 5+ reusable React component libraries, reducing design revision cycles by 30%.

Back-End Development Training (ASP.NET) — Algoriza 10/2023 – 12/2023

Front-End Internship (React.js) — ITI 08/2022 – 09/2022

Member, Problem Solving — ACM 2019 – 2020

EDUCATION

B.Sc. Computer Science — Ain Shams University, Faculty of Computer & Information Science 2019 – 2024

SKILLS

Languages: JavaScript, C#, Python, C++, Java, SQL, Dart

Frontend: React.js, React Router, Context API, Hooks, Bootstrap, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, MongoDB, .NET, ASP.NET, Django, Entity Framework Core

Other: REST APIs, JWT Auth & RBAC, Git/GitHub, OOP, Data Structures & Algorithms, Design Patterns

Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration, Time Management, Adaptability, Attention to Detail, Communication, Self-Learning, Planning

KEY PROJECTS

Mobile Phone Shop Management System (React, Vite, Tailwind, Node.js, Express, MongoDB)

- Built a full-stack system (~22 modules: inventory, POS, installments, maintenance kanban, wallets, treasury) with React/Tailwind/Framer Motion frontend and Node/Express/MongoDB backend.
- Handled 500+ daily transactions; reduced inventory tracking errors by ~60% vs prior manual process.
- Implemented JWT auth, role-based access control, granular permissions, and full RTL Arabic UI for 10+ user roles.

[GitHub](#)

SkyFly (React.js, Vite, Context API, React Router)

- Built a flight booking platform with smart filters, interactive seat map, and multi-step booking flow.
- Achieved sub-1.5s initial load time through code splitting and lazy loading.

[GitHub](#) | [Live Demo](#)

Arabic Furniture E-Commerce (React.js)

- Developed an Arabic e-commerce app with 3D chair designer, virtual room planner, loyalty program, and review system, refactored into modular React components with lazy loading.
- Reduced component re-renders by ~45% after refactor from vanilla JS.

[GitHub](#) | [Live Demo](#)

Breast Cancer Detection (Graduation Project) (React.js, Flask, CNN, SVM, Decision Tree)

- Built a full-stack ML web app: React frontend connected via REST APIs to a Flask backend running CNN/SVM/Decision Tree models for real-time predictions.
- Achieved 94%+ classification accuracy across all 3 models.

DayFlow (Vanilla JS, HTML5, CSS3)

- Built a full-featured task manager with categories, priorities, drag-and-drop, calendar view, Pomodoro timer, and analytics.

[GitHub](#) | [Live Demo](#)

Nile & Clay (React.js)

- Built a premium restaurant website with dark mode toggle, interactive menu filtering, and a reservation system.

COURSES

- Udemy: JavaScript Ultimate Guide, CSS3 Ultimate Guide, The Web Front End Learning
- Mahara Tech: Learn HTML & CSS, Database Fundamentals

CERTIFICATES

- Advanced Front-End Web Development using React JS — ITI
- React Hooks Crash Course — GreatStack [View Certificate](#)
- ASP.NET — Algoriza
- Database Development & Management — Algoriza [View Certificate](#)
